

Activity:

The aim of this activity is for children to practise using the 5 times table to solve multiplications. There are three questions to complete. The first two questions allow children to practise the skill, while the third question extends them as they have to problem solve and explain their answer.

Vocabulary:

Digit cards refers to a physical resource which can be used to create numbers. The digits 0 to 9 are written on individual cards (or paper) and can be ordered to make different numbers. They are especially useful when investigating the value of digits within a number on a place value chart.

A **calculation** is a way to determine an amount. It may involve addition, subtraction, multiplication or division.

Supporting resources:

You can watch a video tutorial about the 5 times table on kids.classroomsecrets.co.uk >> **Year 2 >> Maths >> Multiplication and Division >> Video Tutorials.**

You can watch the answer explanation video which takes children through this activity and ways to answer it on <https://www.youtube.com/user/ClassroomSecretsLtd/playlists> >> **Year 2 Playlist >> The 5 Times Table Answer Explanation.**

The 5 Times Table

1. A. $5 \times 5 = \underline{25}$; B. $\underline{8} \times 4 = 40$; C. $5 \times \underline{7} = 35$
2. A. 10; B. 5 and 0; C. 2; D. 5
3. Sarah is correct because some of the answers are wrong. $5 \times 5 = 25$ not 55; $10 \times 5 = 50$ not 20.
