

Activity:

The aim of this activity is for children to practise compare angles. There are three questions to complete. The first two questions allow children to practise the skill, while the third question extends them as they have to problem solve and explain their answer.

Vocabulary:

An **angle** is when two edges of a shape meet or intersect.

An **acute angle** is an angle that is less than 90 degrees or a right angle.

An **obtuse angle** is an angle that is greater than 90 degrees but less than 180 degrees.

Supporting resources:

You can watch a video tutorial about turns and angles on kids.classroomsecrets.co.uk >> **Year 3 >> Maths >> Properties of Shape >> Video Tutorials.**

Compare Angles

1. **b and d**
2. **False, the hands on clock A show the largest angle.**
3. **B is the odd one out because it is the only shape which only has acute angles.**
