

Multiplication (Equal Groups)

There are 7 counters in each group.

2. $3 + 3 + 3 + 3 = 12$; $7 + 7 + 7 = 21$

3. A: 2, B: 1, C: 3

4. Sandra is incorrect. The third group has only 9 straws.

5. Ezekiel is incorrect. He has written four packs of four, rather than four packs of six. His number sentence should be $6 + 6 + 6 + 6 = 24$.

6. If Brenda buys 3 bouquets of 7, she will have $7 + 7 + 7 = 21$. If she buys 3 bouquets of 8, she will have $8 + 8 + 8 = 24$. If she buys 3 bouquets of 9, she will have $9 + 9 + 9 = 27$.
