

## Multiplication (Equal Groups)

In her flower shop, Jen sells three different bouquets. She orders enough flowers to make an equal number of each bouquet.

### Jen's Flowers

Sunflowers – bouquet of 3

Tulips – bouquet of 4

Roses – bouquet of 8

Sunflowers in 3s

Tulips in 4s

Roses in 8s

Investigate the total number of flowers she could order to be able to make equal numbers of the three bouquets.

Various answers, for example: 4 equal groups of 3 = 12, 4 equal groups of 4 = 16, 4 equal groups of 8 = 32. Jen would need to order 60 flowers in total.
