

## Activity:

The aim of this activity is for children to practise measuring capacity. There are three questions to complete. The first two questions allow children to practise the skill, while the third question extends them as they have to problem solve and explain their answer.

## Vocabulary:

**Capacity** refers to how much a container can hold when it is full.

**Millilitres (ml)** are a unit of measure for capacity. It is equal to one thousandth of a litre.

**Litres (L)** are a unit of measure for capacity. 1 litre is equal to 1,000 millilitres.

## Supporting resources:

You can watch a video tutorial about measure capacity on [<u>kids.classroomsecrets.co.uk</u>](https://kids.classroomsecrets.co.uk)
