

## What is Area?

1. 12
2. A. 8 squares, C. 12 squares, B. 14 squares
3. Shapes A and C
4. Shape B is the odd one out because its area is made up of 10 squares, whereas Shape A and Shape C both have an area of 11 squares.
5. Tile A would not be suitable because it will not fully cover the area of the rectilinear shape, as shown below.

6. Various answers, for example:

= 12 squares

= 8 squares
