

Adding Decimals within 1

Kylie is using counters to create an addition calculation in her place value chart. She says,

I have 20 counters. My calculation must include an exchange. One of the decimal numbers in my calculation must have three empty columns. The answer must be less than 1.

Various answers, for example: $0.782 + 0.03 = 0.812$

	Ones	Tenths	Hundredths	Thousandths
				
+				
	0	8	1	2
