## Area of Rectangles

1. Record the area of each rectangle if each square measures $\mathbf{2 c m}$.
not to scale

Rectangle $\mathrm{A}=\square \mathrm{cm}^{2} \quad$ Rectangle $\mathrm{B}=\square \mathrm{cm}^{2} \quad$ Rectangle $\mathrm{C}=\square \mathrm{cm}^{2}$ Which rectangle is the odd one out? $\square$
2. True or false? Each of these rectangles has the same area.

3. Lauren rounds the length and width of her rear garden to estimate how much turf she needs to order. She orders $84 \mathrm{~m}^{2}$ of turf.

What could the length and width of the garden be?
Find 3 possibilities.
