

Year 5 Drawing Lines and Angles Accurately – Guidance for Parents/Carers

Activity:

The aim of this activity is for children to practise drawing lines and angles accurately. There are three questions to complete. The first two questions allow children to practise the skill, while the third question extends them as they have to problem solve and explain their answer.

A protractor and ruler are required to complete this worksheet.

Vocabulary:

A **horizontal line** is a straight line which runs left to right across the page.

An **angle** is when two edges of a shape meet or intersect.

Lines that cross each other are called **intersecting lines**.

Supporting resources:

You can watch a video tutorial about drawing angles and lines accurately on kids.classroomsecrets.co.uk >> **Year 5** >> **Maths** >> **Properties of Shape** >> **Video Tutorials**.

Other resources:

If your child enjoyed this activity and wants to try more activities linked to this learning, you can sign up for £4.83 per month on classroomsecrets.co.uk/membership.
