

Add and Subtract Integers

1. Zeebob the alien wants to visit three different planets. The journeys he can make, and the distance between the planets in light-years, are shown on his map below.

Zeebob travels from his home planet and arrives on Planet X.

He then visits two more planets. Altogether, he has travelled a total of 957,487 light-years.

Investigate how many light-years there might be between Zeebob's home planet and Planet X.

Planets visited	Distance Travelled	Distance to Planet X
