

Simplify Fractions

1. Paul is simplifying fractions but he has spilt paint over his work.

<p>A.</p> $\frac{\boxed{18}}{\boxed{36}} = \frac{\text{[Orange Spill]}}{\text{[Blue Spill]}}$	<p>B.</p> $\frac{\text{[Yellow Spill]}}{\boxed{24}} = \frac{\text{[Red Spill]}}{\boxed{6}}$	<p>C.</p> $\frac{\boxed{12}}{\text{[Blue Spill]}} = \frac{\text{[Green Spill]}}{\boxed{4}}$
<p>D.</p> $\frac{\boxed{30}}{\text{[Brown Spill]}} = \frac{\text{[Blue Spill]}}{\boxed{5}}$	<p>E.</p> $\frac{\text{[Yellow Spill]}}{\text{[Green Spill]}} = \frac{\boxed{1}}{\boxed{3}}$	<p>F.</p> $\frac{\text{[Orange Spill]}}{\text{[Pink Spill]}} = \frac{\boxed{3}}{\boxed{7}}$

Calculate possible solutions below.

<p>A.</p> $\frac{\boxed{18}}{\boxed{36}} = \frac{\boxed{}}{\boxed{}}$	<p>B.</p> $\frac{\boxed{}}{\boxed{24}} = \frac{\boxed{}}{\boxed{6}}$	<p>C.</p> $\frac{\boxed{12}}{\boxed{}} = \frac{\boxed{}}{\boxed{4}}$
<p>D.</p> $\frac{\boxed{30}}{\boxed{}} = \frac{\boxed{}}{\boxed{5}}$	<p>E.</p> $\frac{\boxed{}}{\boxed{}} = \frac{\boxed{1}}{\boxed{3}}$	<p>F.</p> $\frac{\boxed{}}{\boxed{}} = \frac{\boxed{3}}{\boxed{7}}$
